

The Firenock Target Advantage

- The circuit's logic prevents impact shock from shutting off the light before auto shut off.
- Light auto shut off in 12-17 seconds after lit.
- Patented battery wire connector for easy field battery replacement.
- Patented click and lock system for easy field nock replaceable as it gets worn out.
- Focus beam LED; visible up to 55 yds in the day time and up to 0.62 miles at night.
- Each battery can last up to 1000+ shots.

Will fit most common standard diameter carbon shafts with internal diameter of 0.242" - 0.246" and most aluminum arrows that utilize the Easton Uni-nock system:

Beman ICS: Hunter Elite, Hunter, Hunter Junior, Venture, Beman 9.3, Energy

KEEP OUT OF REACH OF CHILDREN, SMALL PARTS

DISCLAIMER: Firenock target is meant to use on arrows for targets only. Shooting into hard objects like rocks, concrete blocks, hard wood, and on small game, without the use of optional "Extreme Shock Battery End Cap" can cause the battery wire connector to break or nock to crack. This is not covered under warranty.

Assembled in China under Firenock specifications with parts from one or more of the following countries:
USA, Holland, England, Mexico, China, Japan, Taiwan, Korea and Hong Kong.
